# Refurbished VS BSI Refurbished

## A Quick Comparison

KM 781712

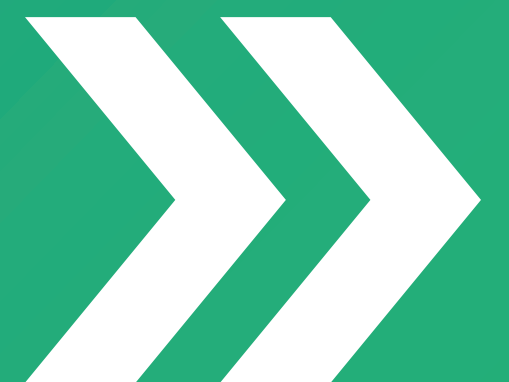

The quality of refurbished equipment in the market is typically highly variable.

At its worst, it is a quick 'wipe' and only basic testing to check if the product starts up.

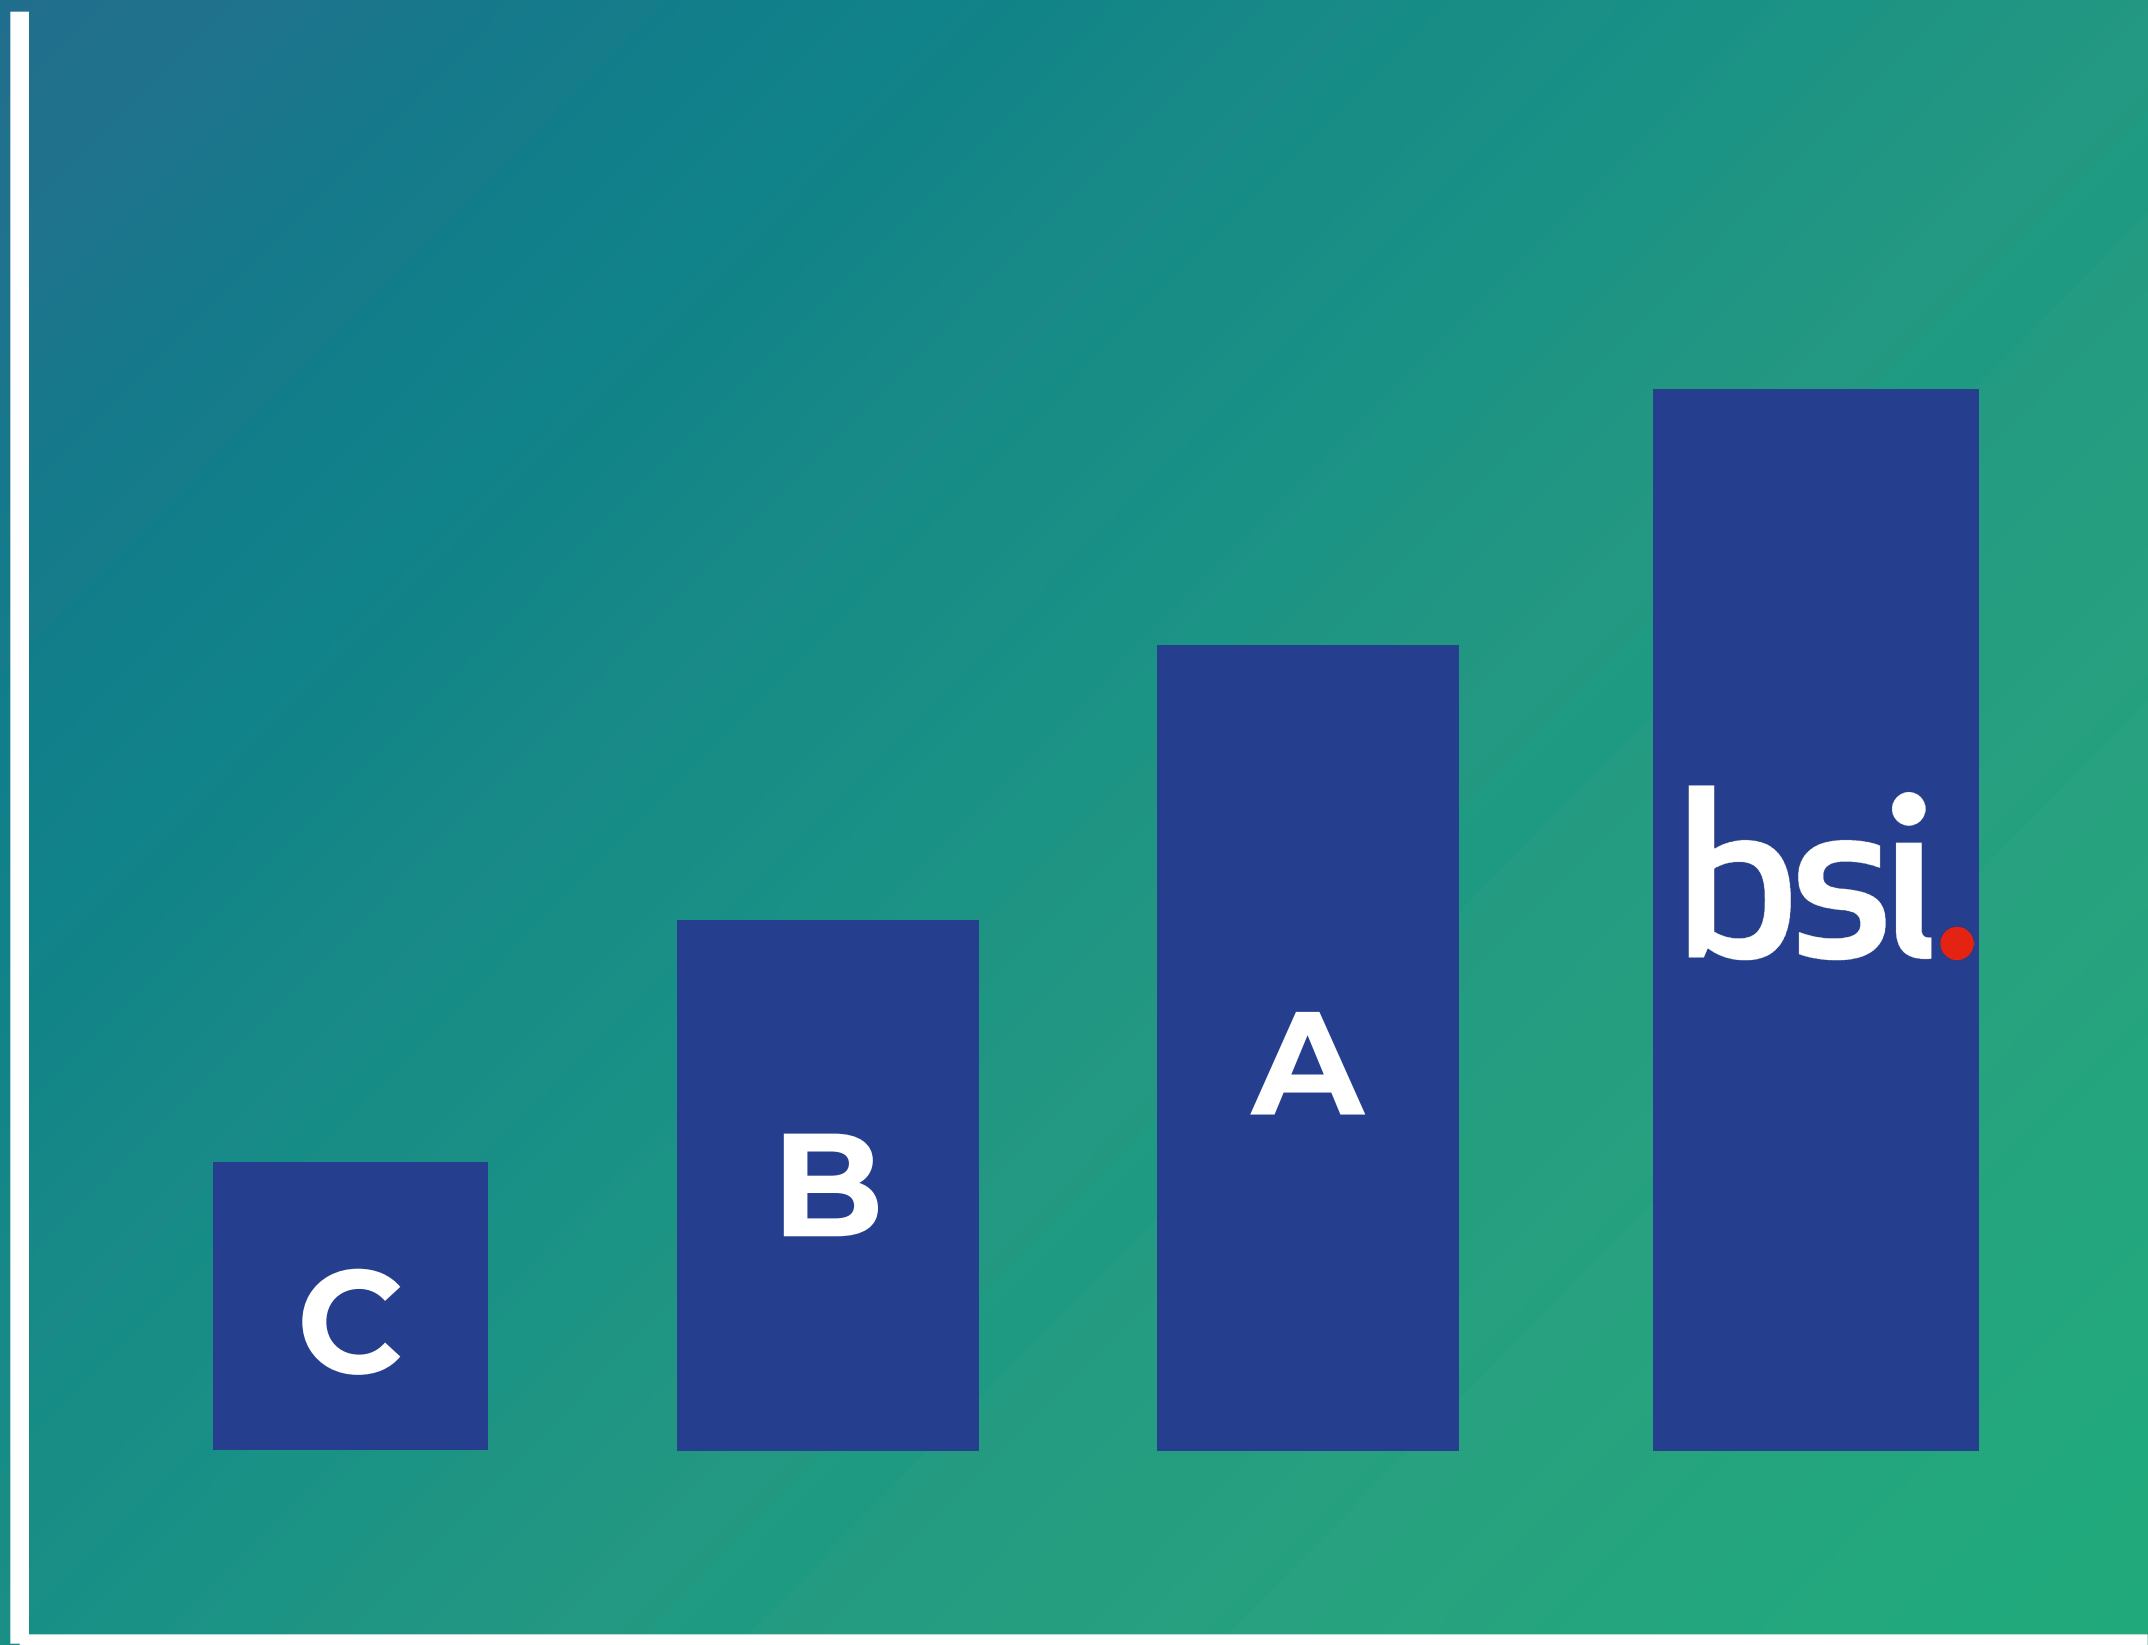

Some of the better refurbishers will clean both outside and inside or even respray the lids, but quality varies.

**But not with our BSI certified refurbished quality.**

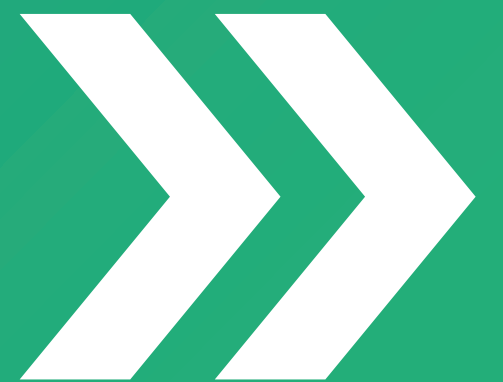

# Refurbished Market

Quality

Grade

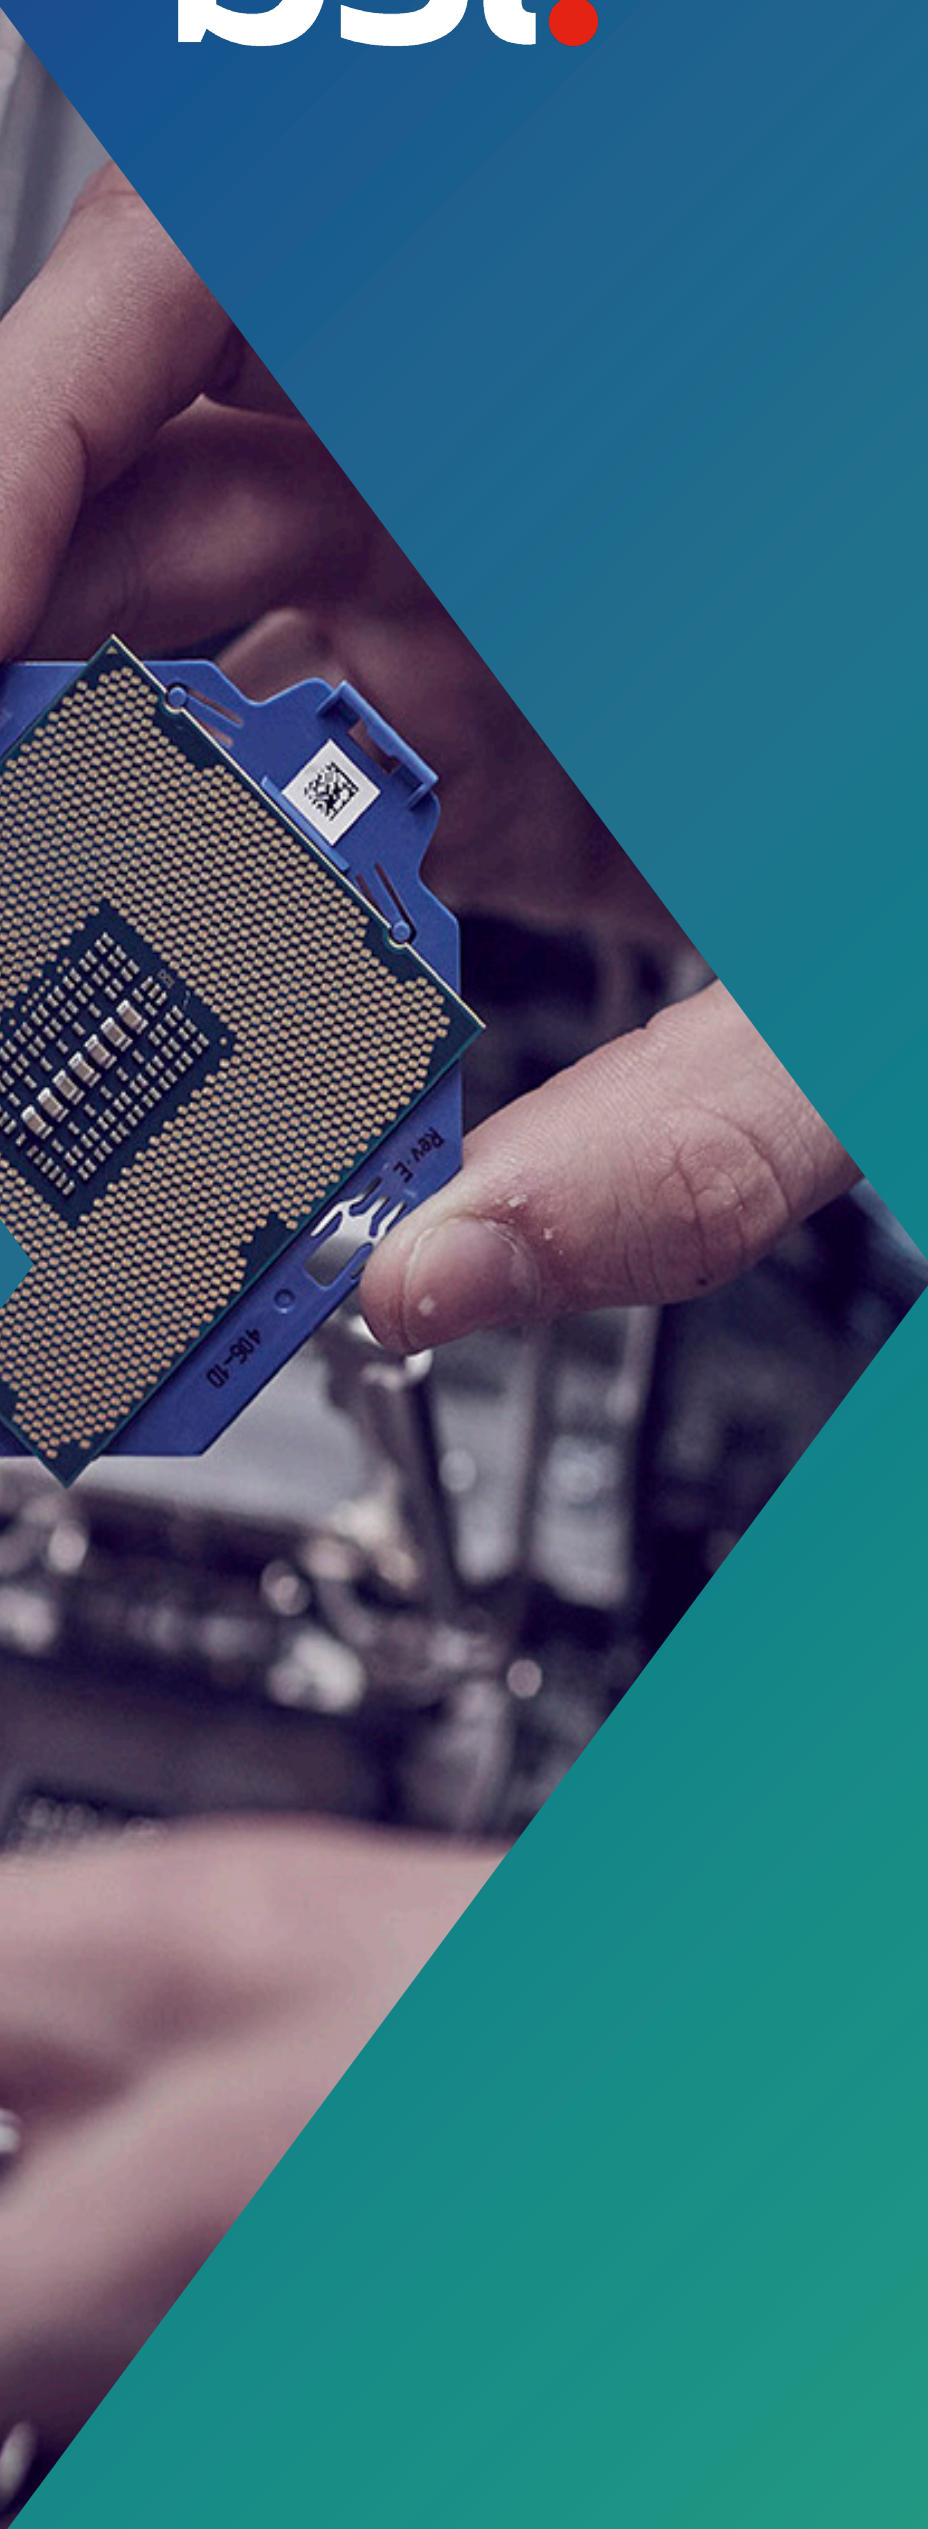

## BSI Refurbished

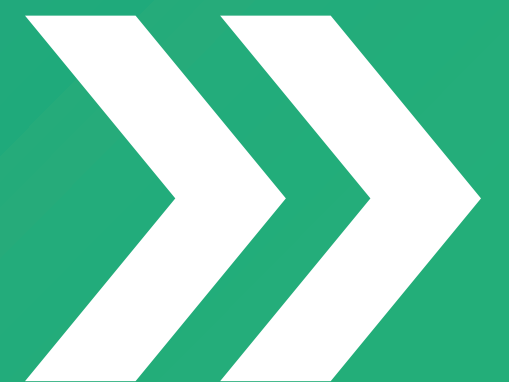

- ✓ Third-party verified consistent quality
- ✓ Engineered upgrades & cleaning
- ✓ Pristine screens
- ✓ Thorough audited testing
- ✓ Low returns rate (RMA)

## Standard Refurbished

- ✗ Inconsistent self-graded quality
- ✗ Cleaned only
- ✗ Minimal tested screens
- ✗ Basic power-on testing
- ✗ High RMA
